

Dear Library Staff,

Thank you for ordering the Ten Pigs Story Stroll!

The story stroll comes with 18 double-sided panels and 20 yard stakes. The story stroll is numbered in the bottom right-hand corner on one side. Once set up, the story can be read in either direction. Place along a walkway on library property, or work with the local Parks and Rec department to find a popular walking path. Fairs, carnivals, or festivals are other great locations for a story stroll.

- To assemble, insert the wire end of the stake into the bottom center of the panel.
- For ease of set up, only one side of the panels are numbered, and the “Once Upon a Reader” panel can go at either end of the walk.
- Extra stakes are included in case some are bent or broken during use.
- We recommend cleaning the stakes after each use, before repacking the story stroll into the carrying case.

If your library would like to catalog your story stroll, records are available via OCLC or MnLink. Please email info@onceuponareader.org if you need help finding the record.
